 Tutorial

Enable

Set Up

Step 2:- Restrict Number (Optional)

If you want to restrict number (only Selected Number can get SMS) Check the Restrict Number.

Contact Number Format:

Enter 10 digits Number for Indian Number, Leave +91

Use +<Country Code> For Outside of India Number.

Ex. +85221420069 (Here + 852 is Hong Kong Country Code.)

(Consider Charge(s) for international call)

Alternatively: you can import from text file, Contact Book or History.

Remove Duplicate: Software automatically remove Duplicate Number from List

Remove Problematic: if you are using for Marketing Purpose, You have too many Number in txt or Excel file for that, and you are Not Sure for Valid Number or not. If you are not checking this option software automatically detect them And give chance to correct them, either it remove it.

No Number, Send this SMS:-If any contact that not included in your contact number list and if you want to inform that like “you Are not in our Client list” or “Use Registered Mobile No” Check this option and type SMS.

The screenshot shows the 'Smart SMS Simple' software interface. At the top, there are three tabs: 'Restrict Number' (selected), 'Send SMS', and 'BroadCasting'. Below the tabs, there is a checkbox labeled 'Restrict Number (?)' which is checked. The main area is divided into two sections. On the left, under 'Enter Contact No : (?)', there is a text input field containing '9638777722'. On the right, under 'Or Import From', there are two buttons: '+ txt File' and '+ Contact Book'. Below these buttons, there are two checked checkboxes: 'Remove Duplicate' and 'Remove Problematic'. Below the checkboxes, it says 'Total Count : 0'. At the bottom left, there is a checked checkbox labeled 'No Number, Send this SMS' with a text input field containing 'You are not in our Client list please contact our HelpLine.'. At the bottom right, there is a green button labeled 'Next >'. The window title bar shows 'Smart SMS Simple' and a close button 'X'.

Step 3:- Send SMS

Add: Type keyword with Message and click on Add Button.

Delete: Select Particular Contact and Press Delete Button from Keyboard.

Default SMS: if any user send keyword that does not match with your inserted keyword notify them like “You Send Invalid Keyword”.And, you must select way to send SMS

From SIM: Consider charge as per network Operator charges.

From API: Setup Your API from your Login Panel. (Help > Client Online Login)

Restrict SMS:-If you want to restrict SMS that only one number per day can receive one SMS only, just Check restrict option and Select number of SMS.

Smart SMS Simple

The screenshot shows the 'Smart SMS Simple' interface with three tabs: 'Restrict Number', 'Send SMS', and 'BroadCasting'. The 'Send SMS' tab is active. It contains a form with the following fields:
